With over six years invested in development and field testing, we believe that the Innovative Reel Technologies® spinning reels have reached the pinnacle of performance. Durability is our top priority and easily achieved with our patented aluminum housing design components. Our reels are intended to last a lifetime, designed for serviceability, and backed by a team poised to exceed the expectation of any customer. IRT's dedicated production and development teams work with our suppliers and customers to provide the highest quality products and services available in the industry today. The 400 model is designed for medium to heavy freshwater fishing applications and light saltwater applications. The reel is best outfitted with 10-15 lb. monofilament line and a medium to fast-action rod. This model works well when using crank baits for largemouth bass or when jigging for walleye. The 400 model can hold 240 yds. of 12lb. monofilament line or 255 yds. of 50 lb. braided line.

Innovation Beyond Description, Performance Beyond Compare®

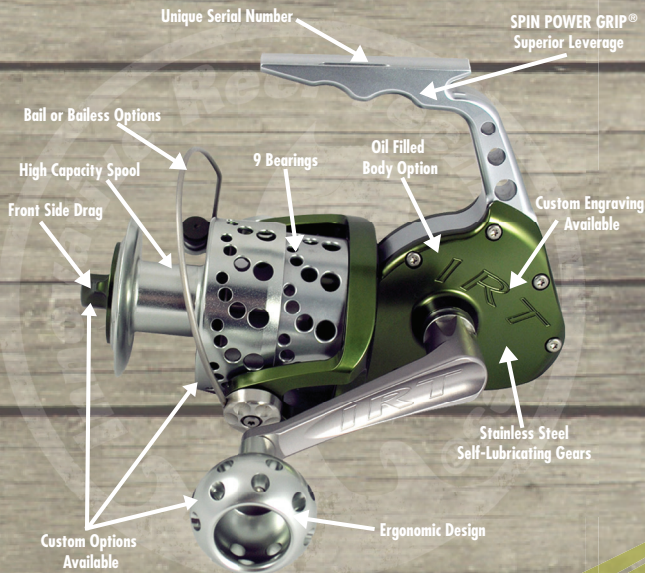

400 MODEL SPINNING REEL

IRT Reels are continuously enhanced based on the feedback provided by field testers and charter boat partners. IRT recommends each reel be sent to our home office in Pine Grove, Pennsylvania, for an annual service DEPENDING ON THE AMOUNT OF YEARLY USE. Service provided by IRT's expert personnel will maintain the superior performance and includes, but is not limited to adjustments to the drag, gears, reel balance, and other functions. Proper maintenance will ensure your IRT Reel functions to the best of its capabilities throughout its lifetime.

Innovative Reel Technologies® reserves the right to modify parts, colors, packaging, options, and accessories without notice.
