With over six years invested in development and field testing, we believe that the Innovative Reel Technologies® spinning reels have reached the pinnacle of performance. Durability is our top priority and easily achieved with our patented aluminum housing design components. Our reels are intended to last a lifetime, designed for serviceability, and backed by a team poised to exceed any customer expectation. IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. The 600 model is designed for use on a fishing boat that targets wrecks. This model is also designed for lighter surf action, including wade fishing with frequent casting. This is the reel you want when schools of large blue fish show up in the breakers or when pulling up flounder from the bottom of the bay. The 600 spool will hold 165 yds. of 25 lb. monofilament line or 250 yds. of 65 lb. braided line, providing plenty of reserve for longer fights. This model complements a five to seven foot light to medium strength rod and 15-25 lb. test monofilament line.

**"Innovation Beyond Description,
Performance Beyond Compare"**

Made in the USA

IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. IRT recommends each reel be sent to our home office in Pine Grove, Pennsylvania, for an annual service **DEPENDENT ON THE AMOUNT OF YEARLY USE**. Service provided by IRT's expert personnel will maintain the superior performance and can include adjustments to the drag, gear, operation, reel balance, and other functions. Proper maintenance will ensure your IRT Reel functions to the best of its capabilities throughout its lifetime.

Innovative Reel Technologies reserves the right to modify parts, colors, packaging, options, and accessories without notice.

Color illustrations shown are as accurate as photography and printing processes allow. Final selection of color should be made from a physical sample. Please contact Innovative Reel Technologies to receive a physical sample of your choice. Additional options are available with extended lead times.
