350 / 65	200 / 25
320 / 80	150 / 40
195 / 150	110 / 50

With over six years invested in development and field testing, we believe that the Innovative Reel Technologies® spinning reels have reached the pinnacle of performance. Durability is our top priority and easily achieved with our patented aluminum housing design components. Our reels are intended to last a lifetime, designed for serviceability, and backed by a team poised to exceed any customer expectation. IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. The 700 model is a versatile large spinning reel with equal size and power. The reel's size is comfortable for lighter saltwater duties like bay fishing with a medium strength rod, but it also provides the line capacity for heavier duties, such as fighting a striped bass from the surf with a heavy 12 ft. rod. When used for freshwater applications, this reel will handle steelhead, salmon, or muskie and complement a medium to heavy strength rod. The 700 spool will hold 200 yds. of 25 lb. monofilament line or 350 yds. of 65 lb. braided line, providing plenty of line capacity for these applications.

"Innovation Beyond Description, Performance Beyond Compare"

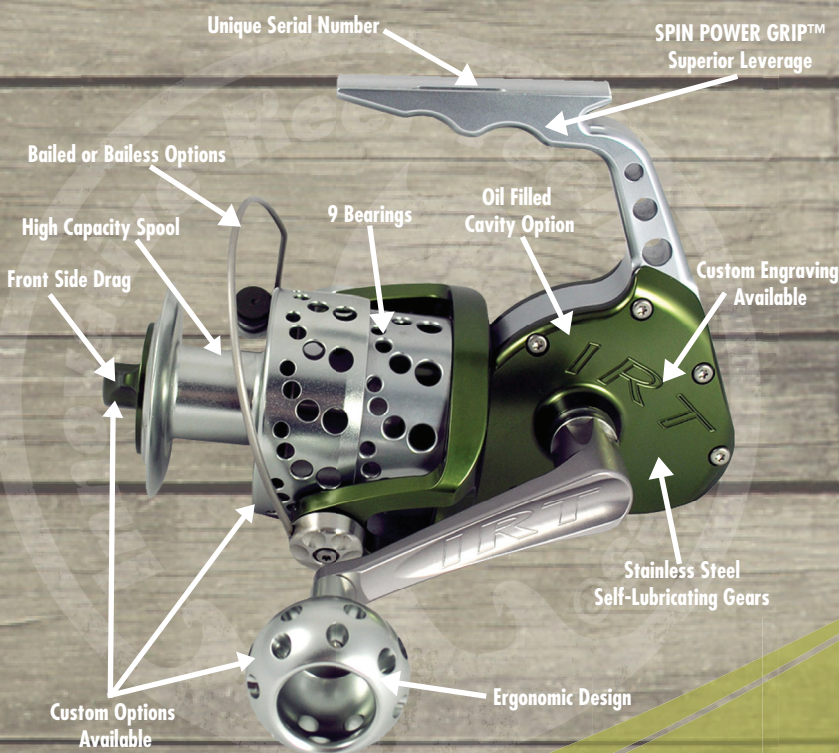

700 MODEL SPINNING REEL

IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. IRT recommends each reel be sent to our home office in Pine Grove, Pennsylvania, for an annual service **DEPENDENT ON THE AMOUNT OF YEARLY USE**. Service provided by IRT's expert personnel will maintain the superior performance and includes, but is not limited to adjustments to the drag, gear, operation, reel balance, and other functions. Proper maintenance will ensure your IRT Reel functions to the best of its capabilities throughout its lifetime.

Innovative Reel Technologies reserves the right to modify parts, colors, packaging, options, and accessories without notice.
