With over six years invested in development and field testing, we believe that the Innovative Reel Technologies® spinning reels have reached the pinnacle of performance. Durability is our top priority and easily achieved with our patented aluminum housing design components. Our reels are intended to last a lifetime, designed for serviceability, and backed by a team poised to exceed any customer expectation. IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. The 800 model is IRT's largest reel to date and is designed for heavy surf fishing and medium offshore duties, like trolling for kingfish out in the ocean. This is the reel that will bring in wahoo, tuna, amberjack, shark, and mahi mahi. The 800 spool will hold 300 yds. of 25 lb. monofilament line or 550 yds. of 65 lb. braided line, providing plenty of reserve for successful trolling.

**"Innovation Beyond Description,
Performance Beyond Compare"**

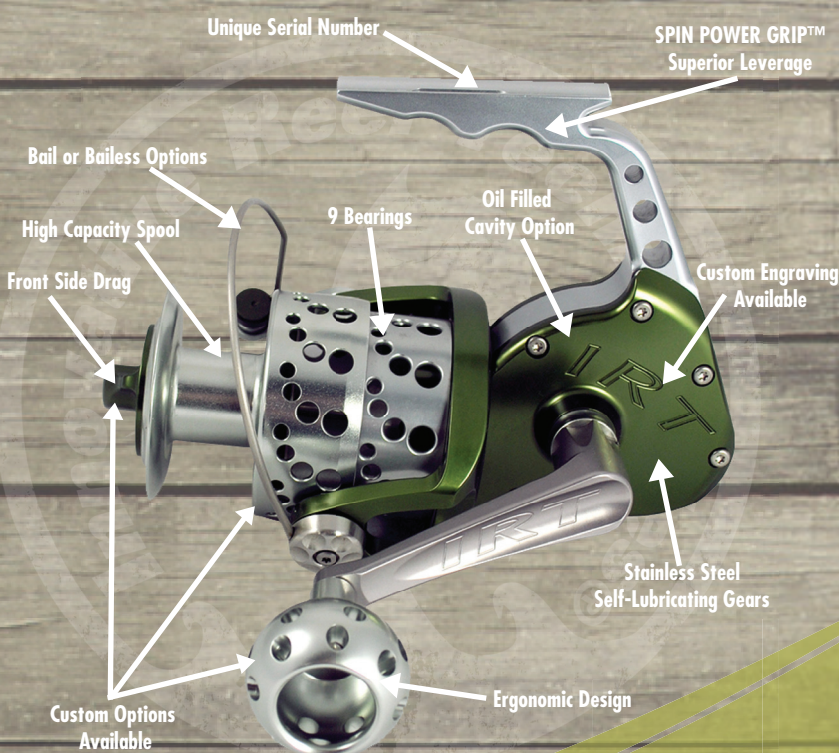

800 MODEL SPINNING REEL

IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. IRT recommends each reel be sent to our home office in Pine Grove, Pennsylvania, for an annual service **DEPENDENT ON THE AMOUNT OF YEARLY USE**. Service provided by IRT's expert personnel will maintain the superior performance and includes, but is not limited to adjustments to the drag, gears, reel balance, and other functions. Proper maintenance will ensure your IRT Reel functions to the best of it's capabilities throughout it's lifetime.

Innovative Reel Technologies reserves the right to modify parts, colors, packaging, options, and accessories without notice.
