With over six years invested in development and field testing, we believe that the Innovative Reel Technologies® spinning reels have reached the pinnacle of performance. Durability is our top priority and easily achieved with our patented aluminum housing design components. Our reels are intended to last a lifetime, designed for serviceability, and backed by a team poised to exceed any customer expectation. IRT’s dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. The 300 model reel is versatile, balancing size and power. This reel is designed for light freshwater and saltwater applications, including bass and trout fishing in small rivers and lakes. The 300 model reel nicely complements a creek or river rod with a 6-12 lb. test monofilament line. The reel can hold 200 yds. of 10 lb. monofilament line or 265 yds. of 40 lb. braided line.

“Innovation Beyond Description,
Performance Beyond Compare”

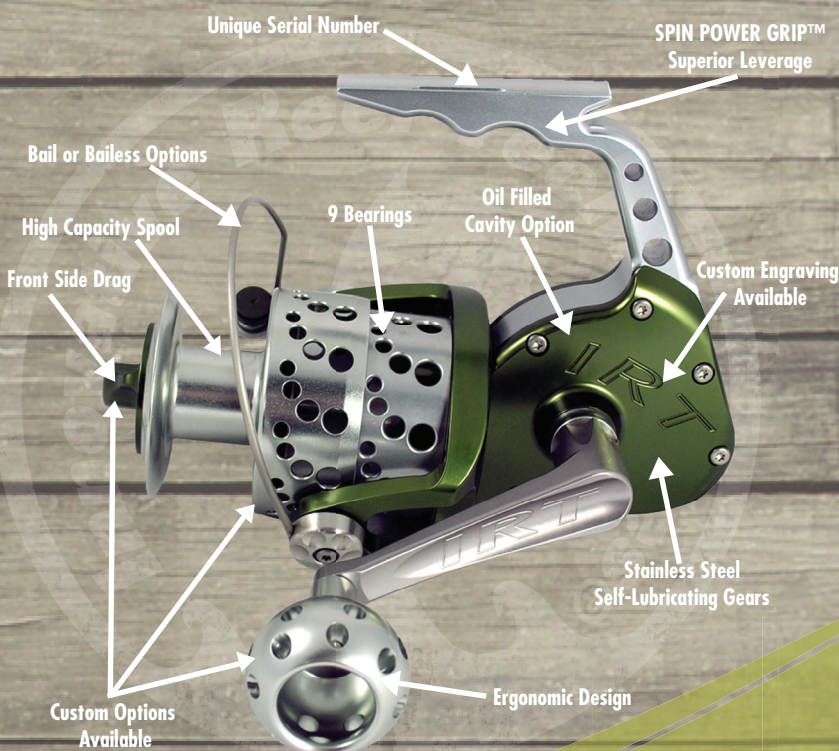

300 MODEL SPINNING REEL

IRT's dedicated development and production teams work with our users to provide the highest quality customer and product service in the industry today. IRT recommends each reel be sent to our home office in Pine Grove, Pennsylvania, for an annual service **DEPENDENT ON THE AMOUNT OF YEARLY USE**. Service provided by IRT's expert personnel will maintain the superior performance and includes, but is not limited to adjustments to the drag, gear, reel balance, and other functions. Proper maintenance will ensure your IRT Reel functions to the best of its capabilities throughout its lifetime.

Innovative Reel Technologies reserves the right to modify parts, colors, packaging, options, and accessories without notice.

IT'S ALL ABOUT THE FIGHT!
