With over six years invested in development and field testing, we believe the Innovative Reel Technologies® spinning reels have reached the pinnacle of performance. Durability is our top priority and easily achieved with our patented aluminum housing design. Our reels are intended to last a lifetime, designed for serviceability, and backed by a team poised to exceed the expectation of any customer. IRT's dedicated production and development teams work with our suppliers and customers to provide the highest quality products and services available in the industry today. The 300 model reel is versatile, balancing size and power. This reel is designed for light freshwater and saltwater applications, including bass and trout fishing in small rivers and lakes. The 300 model reel nicely complements a creek or river rod with 6-12 lb. monofilament line. The reel can hold 200 yds. of 10 lb. monofilament line or 265 yds. of 40 lb. braided line.

Innovation Beyond Description, Performance Beyond Compare®

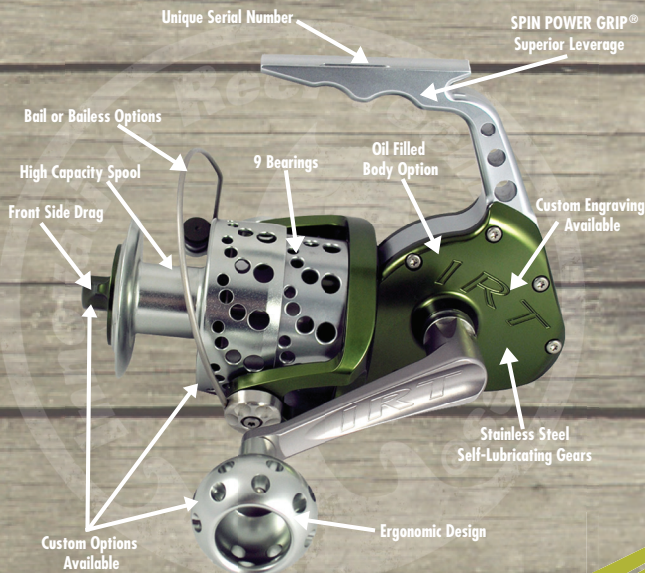

300 MODEL SPINNING REEL

IRT Reels are continuously enhanced based on the feedback provided by field testers and charter boat partners. IRT recommends each reel be sent to our home office in Pine Grove, Pennsylvania for annual service DEPENDING ON THE AMOUNT OF YEARLY USE. Service provided by IRT's expert personnel will maintain the superior performance and includes, but is not limited to, adjustments to the drag, gears, reel balance, and other functions. Proper maintenance will ensure your IRT Reel functions to the best of its capabilities throughout its lifetime.
